- 1 Vortex fine filter
- 2 Smoothing inlet
- 3 Floating filter
- 4 Multisiphon
- 5 Submersible pump
- 6 Storage Tank
- 7 Rainwater plant Optima
- 8 Filter collector
- 9 Waterbarrel 500 l

Step 1
Filtration with WISY
Vortex Fine Filter
including oxygenation and
complete dirt separation

Step 2
WISY smoothing Inlet
distributes the fresh
oxygenrich Water evenly,
prevents stirring of
sediment

Step 3
Extraction of Water
at best level with
with WISY floating filter

Step 4
Overflow with WISY
Multisiphon with skimming
effect, drain odor elimination,
backflow protection, vermin
protection
